

The 2mm Scale Association. Annual Model Competition 2021

Diesel and Electric Locomotives

The following pages show the entries in the Diesel and Electric Locomotives category of the 2021 model competition. Voting takes place online, and all members will be emailed voting instructions and a unique voting ID.

To make your choice, look through the pages, and select your choice of best entry, note its number (eg. D3) and select that choice on the online voting form.

Photograph copyright is held by the individual entrants to the competition.

D4. Class 25

25043 started life as a standard Graham Farish model. With the exception of the bogies everything below solebar level has been machined off and replaced to give a three dimensional prototype representation. This also involved cutting back the original mechanism to suit the modification. Association drop in wheels were used for the conversion and weathering is a mix of powders and oil paints.
